<p>You should work out a green underlay for the later arrangement in a bowl JUNIOR OASIS. The flower seller will choose the green materials for you and prepare them for insertion, cut according to the template and prepare the peel. (Plug-in compound) You manufacture the base from the prepared materials into the shell, at work you use the technique of sticking Work clean and carefully according to the seller's instructions Make sure that the correct procedure is followed when cutting the materials and when washing the plug-in compound. Work in such a way that as little waste as possible is produced. When plugging in, keep the proportions and the type of processing according to the template.</p>
