Objectives of the task

Reflect selected topic.
Integrate floristic work into a specific environment.
Achieve maximum impression with minimal resources.
Offer alternative suggestions for the customer.
Set the price for the decoration.

Work assignment

It marries a middle-aged couple. The celebration takes place in a luxury restaurant, in the family circle - 12 people. The table is rectangular, 1.4 meters wide. The couple wishes for a quiet and elegant environment, candles, warm color compositions and for each guest a small floristic accent or a napkin with floristic details.
Determine the color combinations for tablecloths, napkins, candles and flowers. Design a floristic composition for the wedding celebration that corresponds to the theme "Elegant wedding".

The requirements for the specified task:

Determine the possibilities for flower decoration, shapes and color combinations.
Use at least two technical approaches. The use of toxic, precipitating (seeds), coloring, strong-smelling, damaged and not healthy plants is prohibited.

Physical properties of the object:

Cut flowers, natural and unnatural materials are used for the floristic decoration of the table. The floristic composition should be firm and stable, the viability of the plant must be guaranteed, harmonizing means of artistic expression must match, color design is not to be forgotten. Different design styles can be used.

Functional properties of the object:

The floristic composition should reflect the chosen theme. It should match the environment: style and function. It is

important to make correct color choices, to determine proportions. It uses harmless materials for humans and the environment.
